PROFESSIONAL SUMMARY

Software Developer and Master of Applied Computing graduate with hands-on experience building Android applications, backend systems, database-driven platforms, and data-focused solutions. Skilled in Java, Kotlin, Python, SQL, Firebase, REST APIs, and full-stack development. Experienced in authentication, push notifications, local persistence, database optimization, debugging, automation, and translating business requirements into scalable and user-focused software solutions.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, PHP, JavaScript, SQL, HTML5, CSS3

Frameworks & Mobile: Android SDK, Django, React, Bootstrap, Flutter, WordPress/WooCommerce

Databases & Cloud: MySQL, PostgreSQL, SQLite, Room, Firebase Firestore, Firebase Auth, FCM, AWS

Tools & Concepts: REST APIs, Git, GitHub, Power BI, Tableau, Excel, Databricks, Figma, OOP, MVC, Agile/Scrum, ETL, Data Modeling, Machine Learning

WORK EXPERIENCE

Industry Capstone / Mobile Application Developer

Sept 2025 - Jan 2026

TKO Toy – Wilfrid Laurier University Industry Project

Waterloo, ON

- Developed a production-style retail mobile application from real business requirements, including product browsing, customer accounts, membership tiers, shopping cart functionality, and user profile management.
- Implemented email and Google authentication using Firebase and integrated Firebase Cloud Messaging to support targeted promotional notifications and customer engagement.
- Optimized Firestore data structures and queries while resolving runtime, navigation, and application stability issues identified during QA and functional testing.

Web Developer

Jan 2023 – Jul 2024

Bright Impressions Pvt. Ltd

Ahmedabad, India

- Built and deployed 11 custom web and e-commerce applications using Python/Django, PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap, and REST APIs.
- Reduced backend API response times by approximately 30% through SQL query optimization, caching strategies, and restructuring ORM models for high-traffic application pages.
- Created reusable responsive UI components and collaborated with designers, clients, and developers in Agile sprints to deliver reliable, production-ready features.

PROJECTS

FamCare – Medicine Reminder & Wellness App

Java, Kotlin, Firebase, Room, CameraX, TensorFlow Lite

- Built a full-featured Android application for medicine scheduling, wellness tracking, profile management, emergency contacts, and reminder notifications using Java/Kotlin and Firebase.
- Integrated Firebase Authentication, Firestore, Room database, AlarmManager notifications, CameraX, and TensorFlow Lite to support medicine recognition and persistent reminder management.

Dynamic Airfare Prediction

Python, Machine Learning, Data Analysis

- Developed a machine-learning solution to analyze historical flight data and predict airfare trends using data cleaning, feature engineering, exploratory data analysis, model training, and performance evaluation.

EDUCATION

Wilfrid Laurier University

Master of Applied Computing – GPA: 10.45 / 12.0

Sep 2024 – Dec 2025

Ontario, Canada

Silver Oak College of Technology & Engineering

Bachelor of Computer Engineering – GPA: 8.60 / 10.0

Aug 2019 – May 2023

Ahmedabad, India

CERTIFICATIONS

Data Structures in Python – Coursera

Programming Foundations: JavaScript, HTML & CSS – LinkedIn Learning

Java Industry Program
