PROFESSIONAL SUMMARY

M.S. graduate with hands-on experience building Android and mobile applications, backend services, and database-driven systems. Strong in Java, Kotlin, Firebase, SQLite/Room, REST APIs, and mobile application architecture. Experienced in authentication, push notifications, local persistence, debugging, and translating real business requirements into practical user-focused applications.

EDUCATION

Wilfrid Laurier University

Master of Applied Computing - 10.45 / 12.0

Brantford, Canada

Sep 2024 – Dec 2025

Silver Oak College of Technology & Engineering

Bachelor of Computer Engineering - 8.60 / 10.0

Ahmedabad, India

Aug 2019 – May 2023

WORK EXPERIENCE

Industry Capstone / Mobile Application Developer

2025

TKO Toy — Wilfrid Laurier University Industry Project

Waterloo, ON

- Built a real-world retail mobile application from live business requirements, including product browsing, customer accounts, membership tiers, and shopping cart functionality.
- Implemented email/Google authentication and Firebase Cloud Messaging, supporting 1,000+ targeted promotional notifications.
- Optimized Firestore data models and queries and resolved key runtime stability issues identified during QA testing.

Bright Impressions Pvt. Ltd | Web Developer - Ahmedabad, India

Jan 2023 – Jul 2024

- Built and deployed 11 custom Python/Django e-commerce platforms tailored to individual client requirements, driving a 15% increase in average order value within the first year through improved checkout UX and product discovery flows.
- Reduced backend API response times by ~30% by refactoring database queries, introducing caching strategies, and restructuring ORM models for high-traffic product pages.
- Developed a reusable UI component framework using HTML5, CSS3, and Bootstrap that improved front-end consistency across projects and boosted measured user engagement by 35%.

PROJECTS

FamCare — Medicine Reminder & Wellness App — Java • Kotlin • Firebase • SQLite

- Developed a full-featured Android application for medicine scheduling, wellness tracking, and emergency support, using Java/Kotlin with Firebase and local persistent storage.
- Implemented Firebase Authentication, Firestore-based medicine management, reminder notifications, profile management, and emergency contact functionality.
- Integrated CameraX and TensorFlow Lite for pill recognition, allowing users to scan medicines and automatically retrieve detected pill information.
- Built reminder functionality using local storage and Android notification scheduling, enabling users to create, update, enable, and disable medicine reminders.

TECHNICAL SKILLS

Languages: Java, Python, Kotlin, PHP, JavaScript, HTML5, CSS3

Frameworks & Libraries: Django, React, Flutter, Bootstrap, WordPress / WooCommerce

Databases: MySQL, SQLite, Firebase Firestore

Cloud & Tools: Firebase (Auth, FCM, Firestore), REST APIs, Git, Figma, JDBC, Hibernate

Concepts: OOP, MVC Architecture, RESTful API Design, Agile/Scrum, UI/UX Prototyping

CERTIFICATIONS

- [Programming Foundations \(JavaScript, HTML, CSS\)](#) — LinkedIn Learning
- [Data Structures in Python](#) — Coursera
- [Programming Fundamentals](#) — Foundational computer science concepts
